FROM: Frank Filas 

RE: Site Inspection, DOE/037/004, ML 29272

On June 3, 1987, Frank Filas of the Division and Jerry Mansfield of State Lands hiked over the area of Gramlich Exploration's proposed 1980 uranium mining. An open portal and associated small waste pile were located on an adjoining ridge. This disturbance was less than two acres and represents minimal risk to the public.

The area has not been mined for quite some time and the state lease has been dropped. It is recommended that this file be closed.
